# Flexible, innovative and user-friendly service to support your Revenue Accounting processes

## Presentation

Accelya offers a comprehensive service, OPERA, for the Passenger Revenue Accounting needs of Commercial Airlines. From the basic activities in your Revenue Accounting department, such as eticket data loading, up to the more complex tasks such as prorating and interline invoice audit, airlines can rely on our expertise and perfect balance of software and human knowledge.

Keep track of all your transactions through our modern user interface which provides with easy access and visibility of every document that affects your revenue.

Built from the ground up, designed with modularity in mind, it allows carriers of any size to benefit from our state of the art software and industry leading business practices.

## Main Features

### ► USAGE OF INDUSTRY STANDARD INPUTS: BSP, ARC, TCN, IDEC

Standard inputs mean faster implementation, plus the ability to process airline's own sales to complete the full picture of your issuances.

### ► ABILITY TO INTERFACE WITH EXTERNAL PRORATE ENGINES

If you are part of an airline alliance, you might have committed to use a specific prorating engine. This doesn't mean you can't use the Revenue Accounting system of your choice, OPERA allows the interface with external prorating engines.

### ► OUTWARD INTERLINE BILLING GENERATION

Based on our daily prorating results, we create the standard ICH and ACH forms for you to send. Day to day summaries are available on line.

### ► ACCURATE INWARD BILLING AUDIT

Don't let other airlines manage your money. We make sure the correct amount is charged, and reject billings will be created the following week.

### ► MODULAR SOLUTION

The design of our system enables us to offer easy interfacing with other systems, as well as a tailor made revenue accounting solution that fits your needs just by plug and playing our different modules.

### ► STATE-OF-THE-ART TECHNOLOGY

OPERA has been created in the 21st century, benefiting from the usage of the most modern and flexible technologies.

## Key benefits

### ► COMPREHENSIVE ACCOUNTING INFORMATION

Define for each type of document and event the account number to use in your general ledger. An interface file built for your specific needs will feed your accounting system with day to day activity.

### ► ACCURATE PRORATE MODULE

Our prorating engine, compliant with the industry standards, guarantees the correct allocation of the fare to the correct segment, and maximizes the value of your outward billing.

### ► EXHAUSTIVE DOCUMENT-RELATED INFORMATION

No need to look in different places. All the data related to a document is at the same place. You have access to its usage, prorate details, interline activity and accounting.

### ► IMPROVED VISIBILITY OF YOUR DOCUMENTS

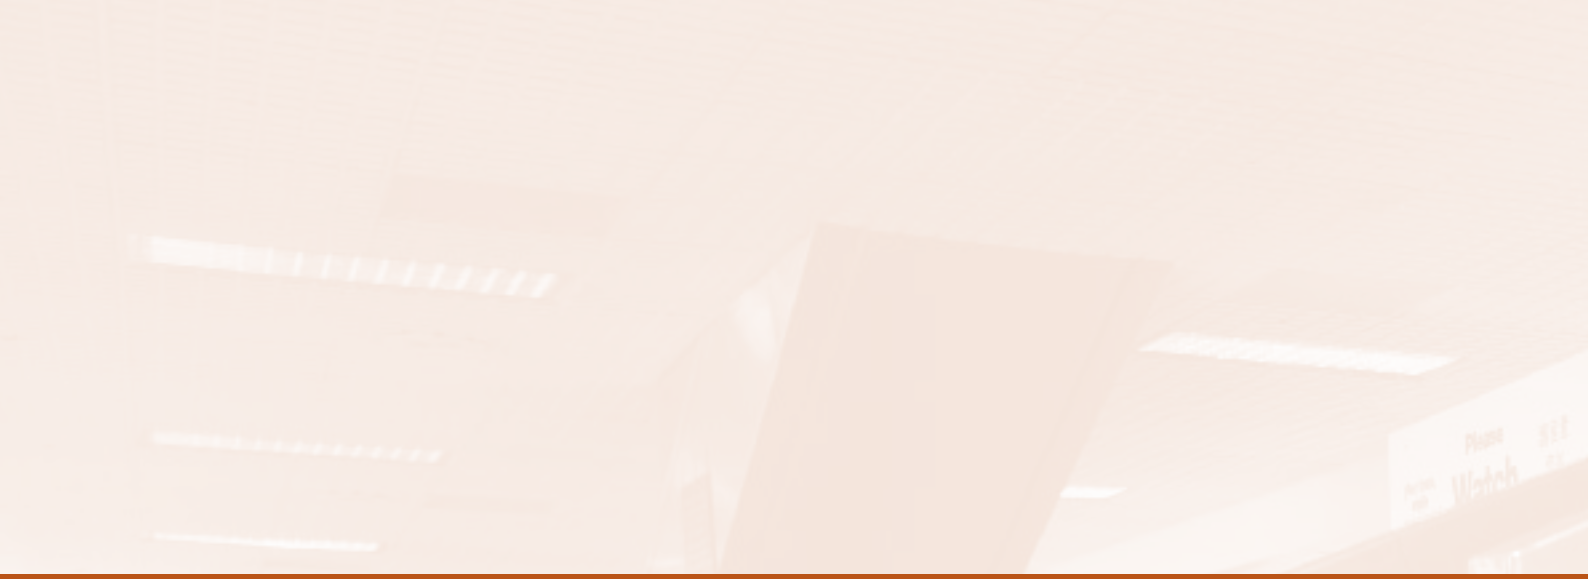

Through a web interface and a modern search engine you have facsimiles of all your documents at your fingertips.

### ► EFFICIENT CREDIT CARD PAYMENTS MANAGEMENT

By comparing your sales paid with credit cards against the effective credits listing from your bank, you make sure your money is where it should be.

### ► FLEXIBLE ANALYSIS ENGINE

Using the latest technologies, you can create your own statistics and analyze your data in real time.
