

Electronic invoicing service by Accelya

Clear' Invoice is Accelya's service for tax-compliant paperless invoicing. As a comprehensive outsourced service, Clear' Invoice processes all of your outgoing as well as incoming invoices, while adapting to the various formats required by each party. With Clear' Invoice, we support you throughout your project in order to ensure your efficient and effective adoption of paperless invoicing.

Clear' Invoice: Total Invoice Management

Clear' Invoice is a comprehensive solution that covers the entirety of your invoice flows – coming in from your suppliers, going out to your clients, or within your organisation for intercompany exchanges.

Clear' Invoice can be adapted to all data formats (structured files and free formats) and includes electronic archiving. For your global projects, Clear' Invoice also offers solutions for the transition, such as scanning your suppliers' invoices, or printing and sending your invoices to clients.

The various functional features of the Clear' Invoice portal streamline exchanges with your clients and suppliers, shorten processing cycles and reduce payment periods. Clear' Invoice also gives you access to archived invoices, and includes a collaborative dispute space and an online validation and workflow approval module.

Legal and regulatory compliance

An international solution, Clear' Invoice complies with, in particular, European Directive 2001/115/EU and its transposition in the various Member States. We ensure legal surveillance in order to guarantee the durability of archiving and compliance with regulatory developments.

Driving to success

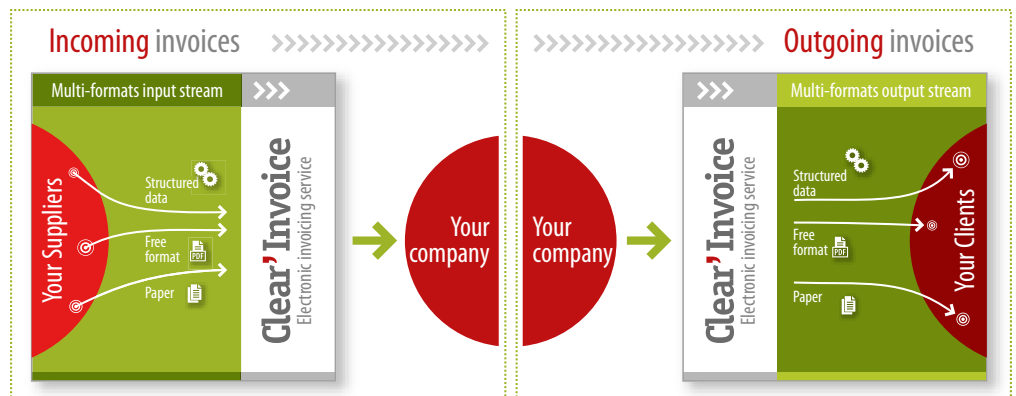

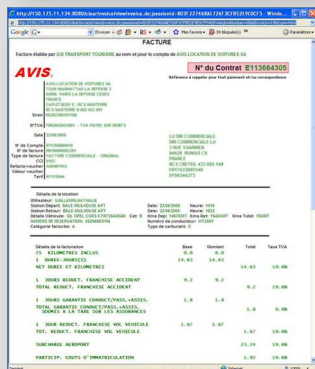

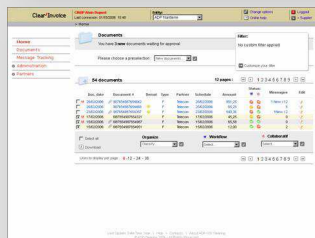

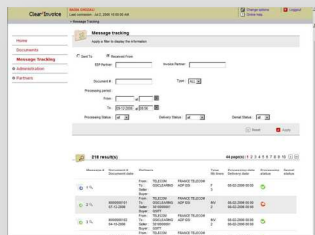

Successfully leading an e-invoicing project goes beyond the mere implementation of a technical solution. Our teams work with you to take stock of your professional and organisational constraints, and to rapidly and efficiently deploy the service with your clients and suppliers.

Under your control

Clear' Invoice gives you simple and secure access to every invoice and to supervision and guidance tools, which allow you to control all of the information flows exchanged with your business partners, at all times.

Immediate access

Electronic invoicing makes you benefit from considerable savings. It helps reduce administrative costs, increase the reliability of exchanges with suppliers and clients, and improve the performance of your financial processes.

With Clear' Invoice, Accelya takes charge of the complexity generated by the diversity of your partners, the heterogeneity of formats and differing local regulations. We are a unique interlocutor and a true partner who adapts to your very needs.
