2	Based on the "management approach" as defined in Ind AS 108-Operating Segments, the Chief Operating Decision Maker evaluates the Company's performance as a single business segment namely travel and transportation vertical.
3	The audited figures for the preceding 3 months ended 30 June 2020 are the balancing figures between the audited figures in respect of the full financial year ended 30 June 2020 and the year to date figures upto the third quarter of that financial year, which were subject to limited review.
4	<p>The COVID 19 pandemic, the country-wide lockdown and the far-reaching travel restrictions in various geographies across the globe have affected the airline and travel industry in an unprecedented way. As the Company's business model is principally based on per transaction pricing, the Company's revenue which is linked to airline passenger transactions has been impacted.</p> <p>The Company is closely monitoring the impact on its customers on account of the COVID 19 Pandemic and the impact of external factors. As the Company's revenues are linked to airline passenger transactions a reduction in revenues in the ensuing quarters is assessed. However, in many contracts with the customers, the Company's revenue stands protected to the extent of the agreed minimum billing. As and when the restrictions are eased across geographies and there is a revival of the economy, the Company expects to see demand revival in the airline and travel industry, and accordingly in the revenues of the Company. At present, the Company does not foresee any material adverse impact in the demand for the software solutions and the Company is well positioned to fulfil its obligations relating to existing contracts / arrangements. The management has taken into consideration internal and external sources of information in determining the impact on various elements on its financial results.</p> <p>Management continuously monitors the market dynamics and keeps evaluating events that have impact on the airline and travel industry. Management has used the principle of prudence in applying judgements, estimates and assumptions including sensitivity analysis and based on the current estimates, the Management expects to fully recover the carrying amount of trade receivables including unbilled receivables and other current and non-current assets.</p> <p>Management believes that it has taken into account all possible impact of known events arising from COVID 19 pandemic in the preparation of these financial results. The eventual outcome of impact of the global pandemic may be different from those estimated as on the date of approval of these financial results. Management has assessed the impact of existing and anticipated effects of COVID 19 pandemic on the future cash flow projections considering various scenarios. The Company believes that it shall be able to meet its commitments and in addition, the funds are expected to be generated from its operating activities. To manage the impact on profitability resulting from reduced revenues due to COVID 19, the Company has implemented and continues to implement various cost control measures across the organization including reducing the cost of human resources (with the consent of relevant employees), travel, marketing and events, etc. to conserve cash to address any uncertainties in evolving situations.</p> <p>Based on the aforesaid assessment the Management strongly believes that as per estimates made conservatively, it will continue as a going concern.</p>
